

Daburn Electronics & Cable

July 8, 2019

To: All Customers of Daburn Electronics & Cable

Subject: California Proposition 65 and Daburn Electronics & Cable Product Disclosure

Dear Valued Customer,

Our products may contain chemical constituents that are listed under Proposition 65 (Prop 65), such as DIDP, antimony trioxide, and carbon black extracts. However, because our products are infrequently handled and are generally not readily accessible within the final product(s) sold to consumers, our products are exempt from the Prop 65 labeling requirements. Based on a Consent Judgment Settlement Agreement (San Francisco Superior Court Cases 312962 and 320342) it was agreed that "Cords and Covered Products", which because of their size, weight or function, are infrequently handled, are exempt. Examples of infrequently handled cords in the Consent Judgment are: building wire, printer cables, riser/plenum cable, speaker wire, telecom data cable, telecom power cable, telephone power and data cords, thermostat cable, utility cable, signal cable, power control/ instrumentation/cable, utility wire and cable. Also exempt are cords and power supplies that are internal components of products that are not normally accessible to consumer during ordinary use. Daburn believes the products supplied to its customers meets this exemption. Hence the material is exempt from the aforementioned Prop 65 labeling regulation.

The information provided in this Product Disclosure, and the identification of materials listed as Reportable under Prop 65, is correct to the best of Daburn's knowledge, information and belief. This disclosure is designed only as a guide for regulatory compliance to Prop 65 labeling requirements. It is not to be considered a warranty or quality specification. In the end, customers are responsible for determining the applicability of specific laws and regulations based on the ultimate individual usage of our products.

Sincerely,

Jim Flaherty

Jim Flaherty

QA Manager
