GPT Wire - PVC Automotive Primary Wire – SAE J-1128

Low voltage stranded wire for use in cars, trucks, trailers, and other vehicles. Known as primary wire or type GPT wire.

Description: Stranded flexible bare copper conductor with PVC insulation. Meets SAE J-1128 for electrical wiring in surface vehicles.

Voltage Rating: 60 Volts

Operating Temperature: -40°C to + 105°C

This series is RoHS compliant.

Daburn Item #	AWG	Stranding	Nominal Insulation Thickness		Nominal Outer Diameter	
			Inches	mm	Inches	mm
